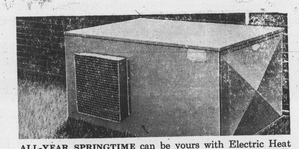
NEW VEPCO RATES
for electric home heating 24-hour water heating
NEW LOW HEATING RATE

Starting this June, your present home can have clean, safe, silent Electric Heating, or complete, all-year Electric Climate Control, low, low rate. After the first 600 kilowatt hours clocked by your regular meter, the rate drops to only 1½c per kilowatt hour . . . which means that from then on your dollar! And the new rate includes other savings, too. Send for VEPCO'S free booklet, "Your Better Way To Heat" and "Come On In, The Weather's Fine." And ask the new low cost of enjoying the world's most modern heat, ... control in your home.

SILENT AND INVISIBLE. Electric Heating Cable plastered right into the ceiling, radiates gentle warmth throughout any room as silently as sunshine! It's out of sight and out of mind, for it's completely automatic and lasts as long as your house . . . without attention.



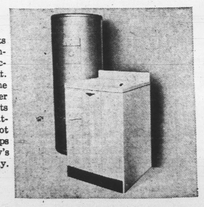
ALL-YEAR SPRINGTIME can be yours with Electric Heat Pump climate control. Cools your whole house in summer . . . then reverses automatically to keep you cozy in winter without fire or fuel. Circulates dust-free air that saves cleaning, keeps your home fresh years longer.

NEW LOW 24-HOUR WATER HEATING RATE

Here's great news for modern families of piping hot water around the clock. Beginning with June, you can enjoy heating electricity in your home at a rate almost as low as present rate for this service. What's more, you can use the new, efficient quick-recovery tank. It's so compact, it goes anywhere . . . so fast it keeps right up with an automatic laundry load after load of wash.

SMALLER BUT FASTER!

VEPCO's new rate lets your home use the compact, quick-recovery Electric Water Heater at right. It's only about half the size of the big low-power tank beside it. Yet its much higher power heating unit gives you hot water far faster . . . keeps up with the whole family's baths, even on washday.



IF YOU NOW HEAT WATER FROM YOUR ONE REGULAR METER . . .

and you want a SECOND, you may save by switching to VEPCO's new rate. Just tell your water . . . Electrical Contractor to put your VEPCO to heater on a separate circuit, with a separate 24-hour time-controller, to the new service meter. After the first 100 kilowatt hours, kilowatt hour . . . you'll then pay only 1c per kilowatt hour . . . 1c per kwh. It's a real saving in cost.

IF YOU NOW HEAT WATER IN SOME LESS MODERN WAY,

tell your Plumbing Contractor or Electric Appliance Dealer you want to change over to 100% clean, silent, safe, automatic Electricity. With our lowest residential rate for 24-hour service . . . and the new, compact, quick-recovery water heaters . . . you'll find electricity can match pennies, and match speed with any water heating system.
